Letter No. Rev. C. 1472-322/35-36 dy 24-3-36 from the Dy Comm, Shimoga Dt. forwarding for sanction an estimate for Rs 22,650 for a scheme of water supply to Chemagiri Town and recommending the payment of half the amount as a grant from State funds and the other half as a loan to the municipality repayable in annual instalments of about Rs 800

Sub 1-6-36 AW 24/4 Dy 24/4

The annual maintenance charges are estimated at Rs 2000 The whole proposal to

meet the maintenance charges, as well as the instalment of the loan for the latter, interest on the subsidy by the revision of taxes and economy that may be effected by curtailing expenses.

23 In view of the limited resources of the municipality, the Dept. cannot recommend that the sum of Rs 2000 allotted to the municipality during the current and next year of the water supply grants may be adjusted towards the cost of the scheme as a grant in addition to half the cost and only the remaining amount viz Rs 9325 given to the municipality as a loan.

24 The grant of Rs 2000 sanctioned for the Chennapur water supply scheme out of the current year's water supply grant has been diverted for the Kayamkulam water supply scheme. The adjustment of this amount towards the cost of the scheme, as proposed by the Dept. cannot therefore be permitted.

NOTE—Contn Sheet

Chennagiri water supply

File No 95 of 1935-36 General and Revenue Secretariat

From The Deputy Commr, Shimoga Dist
No 173 322/c 1472/35-29 dt 15/1/36

Forwards the information called for

3(a) Chennagiri is a Town Mlty. Its population as 3739 (Census of 1931)

The estimated cost is Rs 22,650/-
proposed to be met by Govt & the Mlty in equal proportions

Govt contribution is Rs 11,325

The Municipality want a loan of Rs 11,325/- from Govt to be repaid in annual instalments of Rs 500/- a year

The annual maintenance estimate is Rs 2000/- in addition to the payment of loan instalment & interest on the loan

It is proposed to meet the recurring maintenance charges as follows:-

1) By the levy of general water tax — Rs 2000/- at Re 1/- per rupee of annual rental

2) Revision of assessment — Rs 500/-

3) Levy of market fees shortly — Rs 500/-

Total Rs 3000 p.a

The financial position of the Municipality as disclosed by the

K

Serial No

figures mentioned in the D.O's review on the Budget Estimate of the Mlty for 36-37 shows that there is very little margin left between the income & expr & that the closing balance is below the prescribed minimum

35 The scheme is also costly for a small Mlty for with a population of about ~~4000~~ 4000.

36 It would be doubtful if the Mlty would really be able to realize a sum of Rs 800/- per annum by the levy of the taxes etc as above for meeting the recurring charges & whether the citizens may not protest to pay water tax equal to the rates on buildings etc.

37 There will be a reasons to get through the scheme. But it may not be possible for them to repay the loan even in entire years. A definite ~~reasons~~ of the Mlty as to the ~~No~~ financial ~~state~~ position is necessary. It is also a point for consideration whether Govt could contribute a sum of Rs 11325/- at least next year towards this scheme.

38 In the light of these facts, it is for orders if the scheme may not be deferred for the present.

39) The above note is for perusal. As the balance left out of the Water Supply grant is only Rs 1118/- this Scheme will

SIR,

With reference to your letter No.L.1463 dated 23rd August 35 asking me to expedite the Scheme of water supply to Chennagiri town, I have the honour to invite reference to my No.M3.C.240-69/35-36 dated 6th August 35 forwarding a copy of my letter tothe Director of Health on the subject.

A copy of the letter is enclosed herewith for ready reference

I have the honour to be
Sir,
Your most obedient servant,

Deputy Commissioner,
Shimoga District
(absent on tour)

Letter No.M3.C.240-69/35-6 dated 6th August 35 from the Deputy Commissioner, Shimoga District to the Director of Health in Mysore, Bangalore.

With reference to Development Secretary's letter No.L.273-80/M1 dated the 12thJuly 1935 calling for proposals for the distribution of water supply and Town Improvement Grants for the year 35-36, I have the honour to state that there are four water supply schemes in this District as noted in the margin in various stages of these, the scheme for the supply of water to Chennagiri has been partly worked out and as regards Shikarpur the scheme is ready for consideration; and the other two are still in the initial stages and are under correspondence.

Chennagiri
Shikarpur
Honnali
Kumsi

In regard to Chennagiri water supply scheme, I am to state that an estimate for Rs 14200/- was originally prepared by the Bureau of Sanitary Engineering to sink a bore well and distribute the water thereof to the Town by means of pipes. As a part of the scheme a borewell was sunk about a mile away fromthe Town at a cost of Rs 1645/- andthe entire cost has been paid by the Municipal Council of the place. As the Municipality had no funds at its disposal for financing further works contemplated, the estimate was revised to Rs 9200/- which included the cost of the borewell. Even according to the revised estimate a sum of Rs 8000/- was necessary to carrying on the work but as the Municipality even then had no money to pay any portion of the estimated cost, a recommendation was made in this office letter No.M3.C.895-170/34-35 dated 22-1-35 that the amount required might be given as a grant from Government but this proposal was not approved by you with the observation that unless the Municipality could meet half the cost there was no question of giving any grant

grant as recommended and the matter stands now at thisstage. From the letter of the Superintending Engineer No.p98 dated 29th July 35, it is seen that the existing bore well does not yield sufficient quantity of water for the whole town and that the revised estimate is for providing only a few taps in the town to make use of whatever water is available in the well. As the quantity of water in the borewell is found inadequate for the whole Town and as it is not even known what population of the Town is likely to be served by it and as the Municipality is not in a position to meet any portion of the ~~ex~~ cost of the revised estimate now prepared, it seems to be very necessary and desirable to devise some cheaper method of making the borewell water available to the Towns people. During my inspection of the Town I have looked into the matter and I am of opinion that a cheaper method of achieving the same result would be to provide a rotary pump to the existing well and pump water to a lifting tank to be located at the highest point on the road leading to the heart of the Chennagiri Town upto which the water can be pumped up and provide a few taps near the tank itself. This I understand costs only about Rs 2000/- and as the Municipality has already paid Rs 1640/- for the borewell, a grant of Rs 2000/- may at least be sanctioned to enable me to complete the work. ~~This is one of Dewan's Tour subjects which requires immediate attention~~ If the borewell is found capable of supplying more water the cost of providing more taps further interior may not be much. This is one of Dewan's Tour subjects which requies immediate attention.

For Shikarpur an estimate for Rs 20,000/- has been prepared and I have addressed Government to accord administrative sanction for the same and orders are awaited. As the Municipality have resolved to contribute half the cost and the required money is available a grant of 10,000/- may be sanctioned for this work also so that it may be taken on hand this year

In regard

In regard to Town Improvement grant, applications are being received for the same fromthe Municipalities of Shimoga and Bha dravati. Last year a recommendation was made in this office letter No.M3 C. 977/33-34 dated 24-11-33 for the grant of Rs 5000/- to Shimoga Municipality for filling up pits and hollows, removal of rank vegetation and draining off, of water logged areas with a view to improve the health of the Town and a statement of such works with the probable cost of each item of work was also forwarded therewith. But no grant was sanctioned on the ground that no amount was available at the time, out of the Town Improvement Grant. It seems absolutely necessary to carry on an Anti Malaria Campaign in the Shimoga Town on the lines of the scheme which is now being worked out in the Bangalore City Municipality and this can be done only if a grant is sanctioned to theshimoga Town Municipality. I request in these circumstances that a grant of Rs 8000/- may be kindly got sanctioned for Shimoga. Further Bhadravati Town has to be improved and as a preliminary, the slumps have to be cleared by resorting to acquisition of certain private properties. Some of the proposals for acquisition have been kept by, by the Municipality for want of funds. A grant of Rs 2000/- may be sanctioned for that Municipality.

In view of the above circumstances, I request that a sum of Rs 12,000/- for water supply scheme and Rs 10000/- for Town Improvement may kindly be sanctioned to this District out of the current year's grant.

SIR,

With reference to your letter No.L.4730/M1. dated 19/20th December 1935, I have the honor to enclose herewith a copy of Shimoga District Deputy Commissioner's letter No.M3.C.240-69/35-36 dated 23rd December 1935, for the information of Government I am requesting the Sanitary Engineer to prepare the alternate proposal of the scheme for the water supply of Channagiri town utilising the perennial stream close to Channagiri.

I have the honour to be,
Sir,
Your most obedient servant,

P Parthasarathy

Director of Health.

BI VS

Letter No. M3.C.240-69/35-36 dated 23rd December 1935, from the Deputy Commissioner, Shimoga, to the Director of Health in Mysore, Bangalore.

With reference to your letter No. C.6-54 dated 23rd November 1935 enquiring whether the scheme for supplying a portion of Chennagiri Town with borewell water at an estimated cost of Rs.9200/- as proposed by the Sanitary Engineer may be approved, I have the honor to state that the Municipal council have already resolved that they are not for the Rs.9200/- estimate (copy enclosed). It would be well if a scheme reasonably calculated to supply the whole town is drawn up with provision either for an additional borewell or for utilisation of water of the perinial stream on the Chennagiri-Holalkere road as suggested by the Sanitary Engineer during his recent visit. The matter will then be referred tothe Municipal Coyncil for their consideration.

As the Municipal Finances are meagre, half the amount have to be granted by Government and the otherhalf made up by the Municipal quota and the loan to be granted by Government.

I request that immediate action may be taken to provide a suitable water supply scheme for the town.

"C o p y"

O Subbarayan
Director of Health.

SIR,

Subject:- WATER SUPPLY TO THE CHANNAGIRI TOWN.

I have the honour to state that the Sanitary Engineer has prepared an Estimate amounting to Rs 22, 650/- for providing Water supply to Channagiri Town and that on its being referred to the Municipal Council of Channagiri, they have resolved at their Meeting held on 22-4-1936 that the estimate may be sanctioned, that a grant of half the cost of the estimate may be paid out of State Funds and that the other half also may be advanced by Government as a loan repayable by the Municipality in annual instalments of Rs 500/- a year. The Municipal Council propose to levy Water tax at a rate equal to the rate of tax on Buildings & lands and effect savings by retrenching their expenses so as to find funds to meet the annual maintenance charges of the Water Works which are estimated at Rs 2000/- and the loan instalments with interest.

2. The question of having a satisfactory Scheme of Water supply at Channagiri Town has been under consideration for a ng time. An estimate for Rs 14, 200/- for supply of drinking

drinking water by means of Bore-Well had been prepared in the year 1934 and it was subsequently modified by eliminating certain items of work and reducing the cost to Rs 9, 200/- In pursuance of the latter scheme, a Bore-Well was sunk entirely at the expense of the Municipality and a sum of Rs 1645/- has already been paid by it towards that. The yield of the well having been fund to be low, that scheme had to be given up and the Sanitary Engineer requested to go into the matter again and give a more satisfactory scheme. He has intimated that that scheme may now be dropped and the present estimate which is designed for supplying filtered water to the whole Town by installing about 20 street taps taken up.

3. The Scheme provides for installing a 10 H.P. Engine near the Perennial Stream to the Town on the Holalkere Road across which a small dam would have to be constructed. The annual expenditure for maintenance and other charges comes to Rs 2800/- as noted below

1.	Annual maintenance charges of the Water Works.	Rs 2000/-
2.	Loan instalment.	500/-
3.	Interest on loan about.	300/-
		Rs 2800/-

4. The Municipal Council expects to realise this amount by the levy of Water tax, increased revenue anticipated by the revision of taxes and economy that may be effected by curtailing expenses.

5. In view of the urgent need for providing Drinking

Water to the long suffering people of Channagiri Town, I request that the sanction of the Government may be kindly obtained to the estimate, the payment of half the amount as a grant from State Funds and the other half as a loan repayable in annual instamments of about Rs 800/- inclusive of interest. With the levy of Water tax which the poeple may not grudge to pay in view of the difficulties they are now experiencing and new taxes such as Market fees etc, it will not be difficult for the Municipal Council to repay the loan as suggested.

6. A sum of Rs 2000/- has been set apart for the Channagiri Water supply scheme during the current year. It has been stated above that Rs 1650/- have been paid so far by the Municipal Council for the Bore-Well sunk by the Sanitary Department which has now to be abandoned Another sum of Rs 200/- and odd is being demanded on account of that well. The Municipal Council have requested that the loan asked for viz half the cost of the Estimate may be reduced by the sum spent by them for the Bore-Well. In view of the limited resources of the Municipality, the sum of Rs 2000/- provided during the current year for Channagiri Town Water supply may be adjusted towards the cost of the Scheme as a grant in addition to half the cost and only the remaining amount viz. Rs 9325/- given to the Municipality as a loan It would not at all be difficult for the Municipality to pay up this debt in instalments

PTO

2. The Municipal President's report No. 188/35- dated 24th April 1936 with its enclosures ~~are~~ is forwarded herewith for reference.

I have the honour to be,

Sir,

Your most obedient servant,

S. Narayana Rao

Deputy Commissioner,

Shimoga District.

GEN. & REV. SECT.
18 DEC 1936
L & C

SUBJECT -- WATER SUPPLY SCHEME - CHANNAGIRI TOWN.

Sir,

Adverting to the correspondence ending with your letter No. L 9626/M1 93-35-60 dated the 18th June 1936 on the above subject, I have the honour to forward herewith report No. M C. 65 dated the 10th November 1936 received from the President, Channagiri Municipality and to state as follows --

The Municipal Council proposes to levy general water-rate at the same rate at which the buildings and lands are assessed in the municipality. The present annual income under mohatarfa being about Rs 2,050/-, the realisation from wheter-rate will also be equal to the same The income to be derived from the water-rate alone will be more than ample to meet the annual maintenance charges of the water-supply scheme which is estimated at Rs 2,000/-. In addition to the water-rate, the council intends to introduce the levy of market fees and octroi on some fresh items and the proposals have already been published calling for objections. The impending revision of assessment will also bring in some increased revenue to the municipality. The President has not given an estimate of the increase by the revision. However, taking 25 per cent as the rough estimate of the increase, the municipality would get about Rs 500/- from the revision. The income from market fees and from the levy of octroi on additional items may be estimated at Rs 500/- Thus, the total income from the new imposts and the revision of assessment would come to about Rs 3,000/- per annum (Rs 2,000/- from water-rate, Rs 500/- from revision of assessment and Rs 500/- from market fees and octroi). With this increased income, the municipality could easily meet the annual maintenance charges of the scheme and also pay the

instalments

instalments.

The statement of assets submitted by the President has not been correctly prepared. The total liabilities of the municipality amount to Rs 1,817/-. As has already been reported, the council has invested a sum of Rs 500/- in 6½ % State Loan Bonds and from the present report, it is seen that a sum of Rs 314/- is in Savings Bank Deposit in addition to a cash balance of Rs 362/- in the Treasury at the end of November 1936. The arrears of mohatarfa tax to be collected is Rs 2,510/- The liabilities could be discharged by collecting the arrears.

In the circumstances explained, I am of opinion that the municipality will be able to discharge the commitments and request therefore that early sanction of Government may be obtained to the scheme.

The Records accompany.

I have the honour to be,
Sir,
Your most obedient servant.,

S Narayana Rao

Deputy Commissioner,
Shimoga District

BANGALORE.

Sir,

Adverting to your letter No.C 6-91 dated 10th April 1936, stating that a comprehensive scheme for the water supply to Chennagiri Town amounting to Rs.22,500/- for supplying water to the town from the 'Halla' running close by, in Holalkere road has been sent to the Deputy Commissioner, Shimoga District for approval, I am directed to observe that the estimated cost for the scheme referred to, is rather high for such a small place as Chennagiri town and to request you to be good enough to intimate whether a cheaper scheme cannot be thought of, by means of a bore-well or some other source.

The estimates are returned herewith for your reference and retransmission.

I have the honour to be,
Sir,
Your most obedient servant,

Sd. M.Venkatanaranappa.

Secretary to Government,
Development Department.

Memo No. L 5749 Dated, Bangalore, the 3rd February 1937.

SIR,

Subject Water supply Scheme, Chennagiri Town

With reference to the Development Secretary's memo No. L 5749 dated 6th February 1937 forwarding copy of letter No.5748 to the Director of Health observing that the estimated cost of the Scheme is rather high for a small place like Chennagiri and enquiring whether a cheaper scheme could not be thought of by means of a Borewell or some other source &c., I have the honour to state that the Sanitary Engineer, who toured in this District last month visited Chennagiri and examined the scheme in detail and was of the opinion that water supply from a Borewell would be much cheaper in respect of the initial cost as well as the annual recurring charges and that the present scheme of constructing a ~~dam~~ dam across the halla and pumping water therefrom to the Service Reservoir would be very costly especially as the price of iron materials had gone up As there was already one Borewell in the town to which a hand Rotary Pump had been fitted up recently at private cost, the Sanitary Engineer considered that if another Borewell was sunk below the tank Bund near the Travellers' Bungalow, it might be possible to get a sufficient supply of water and that the whole cost of distribution &c., might not go beyond Rs 18,000/- I agree with him

The Sanitary Engineer has accordingly intimated to the Director of Health (Vide Copy of his letter No.193 dated 24th August 37 enclosed for ready reference) and has asked me to take action in the matter of sinking the Borewell He requests that

a deposit

mains to a storage tank which is proposed to be erected on a suitable elevation in the slope of the hill for distribution of water to the town This scheme is estimated to cost roughly about Rs 18,000/- and after discussion with the Deputy Commissioner on the possibility of this scheme, it was understood that this will be within the reach of the Municipality

Hence the first thing that has got to be done now is to sink a borewell in the spot selected by us and the details of the water supply scheme from these two borewells will be worked out after water supply is assured ---

No.777/25-8-37

Copy of the above is forwarded with compliments to the Deputy Commissioner, Shimoga District, for kind information and taking early action in the matter of sinking a borewell in the spot already selected A deposit of Rs 1000/- as required by rules may be made with this Department to enable this office to arrange for sinking the borewell.

Sd/- N. Krishnaiengar,
Sanitary Engineer

Bangalore.

SIR,

Subject: Water supply Scheme, Channagiri Town.

With reference to the Development Secretary's memo No. L.5749 dated 6th February 1937 forwarding copy of letter No.5748 to the Director of Health observing that the estimated cost of the Scheme is rather high for a small place like Channagiri and enquiring whether a cheaper scheme could not be thought of by means of a Borewell or some other source &c., I have the honour to state that the Sanitary Engineer, who toured in this District last month visited Channagiri and examined the scheme in detail and was of the opinion that water supply from a Borewell would be much cheaper in respect of the initial cost as well as the annual recurring charges and that the present scheme of constructing a dam across the halla and pumping water therefrom to the service reservoir would be very costly especially as the price of iron materials had gone up. As there was already one Borewell in the town to which a hand Rotary pump had been fitted up recently at private cost, the Sanitary Engineer considered that if another Borewell was sunk below the tank Bund near the Travellers' Bungalow, it might be possible to get a sufficient supply of water and that the whole cost of distribution &c., might not go beyond Rs 10,000/-. I agree with him.

Cul.C. 27/9/37

2642

The Sanitary Engineer has accordingly intimated to the Director of Health (Vide Copy of his letter No.193 dated 24th August 37 enclosed for ready reference) and has asked me to take action in the matter of sinking the Borewell requests that a deposit

a deposit of Rs 1000/- may be made to enable him to arrange for sinking the borewell.

In the foregoing circumstances, I request that sanction of Government may be kindly obtained to the Scheme as now formulated by the Sanitary Engineer and also for the sanction of an immediate Government grant of Rs 500/- towards the cost of putting up the Borewell. The remaining sum of Rs 500/- for providing the well willbe asked to be met from out of the Municipal Funds.

It may be stated that the municipality has already incurred an expenditure of Rs 1050/- towards the existing Bore - well and my recommendation to write off the sum of Rs 356-3-6 has been since sanctioned.

I have the honour to be,
Sir,
Your most obedient servant,

Sd/- S. Narayana Rao,

Deputy Commissioner,
Shimoga District.

Memo

Copy of the above is forwarded with compliments to the Director of Health in Mysore, Bangalore.

Copy to the President, Chennagiri with copy of the Sanitary Engineer's letter referred to.

S Narayana Rao

Deputy Commissioner,
Shimoga District.

Letter No.S.E.193 dated 24th August 37 fro the Sanitary Engineer, Bangalore to the Director of Health in Mysore, Bangalore

---

Subject: Detailed estimate for the Chennagiri Town Water Supply Scheme.

With reference to your No.C.1385-12 dated 8th July 37 and subsequent reminder No.C.1385-12 E. dated 6/10th August 37 I have the honour toreport that I inspected the original scheme prepared by this office for Chennagiri water supply with the Deputy Commissioner, Shimoga District, during my tour in the District in the second week of this month and after going through the scheme indetail on the spot, I find that the question of constructing a dam across the halla outside the town and pumping water therefrom to a service reservoir erected on the slppe of the hill as per old scheme, is a very costly one particularly now that the prices of iron materials have gone up very high and the resources of the Municipality are too meagre to meet it.

Under the circumstances, I think that water supply from a borewell will be much cheaper in respect of initial cost as well as annual recurring charges. There is already one borewell to which a hand rotary pump has been fitted up recently and is now in use. This well has been tested and found to yield continuously a supply of 700 gallons an hour. If another borewell is sunk, below the tank bund which is situated close to the town, it is possible that a very large supply of water may be available as the spot selected by us during the recent inspection is in a valley where a number of draw wells have already been in use for a long time with unfailing supply of water. If the 2nd borewell is a success, then it is proposed to pump water from both the borewells and supply the needs of the town. It is learnt that the main electric power line from Shimoga to Harihar will pass very close to Chennagiri town and hence there is a chance of getting electric power in the Chennagiri town itself. The two borewells can be fitted with electric driven deep well pumps and water pumped from both these wells through suitable, C.I.

mai..s to a storage tank which is proposed to be erected on a suitable elevation in the slope of the hill for distribution of water to the town. This scheme is estimated to cost roughly about Rs 18,000/- and after discussion with the Deputy Commissioner on the possibility of this scheme, it was understood that this will be within the reach of the Municipality.

Hence the first thing that has got to be done now is to sink a borewell in the spot selected by us and the details of the water supply scheme from these two borewells will be worked out after water supply is assured. ---

Secretary to Government,
Local Self Government Department,
Bangalore.

SIR,

Subject Water supply Scheme - Chennagiri Town

With reference to your letter No.L 3150/M1 95-35 dated the 28th September 1937 forwarding copy of letter from Director of Health on the above subject and requesting me to forward the views of the municipal council in the matter and also to intimate how they would propose to meet the cost of the revised estimate, I have the honour to forward herewith the resolution of the Council received with the President's letter No.M1 89/37 dated 2nd November 1937 The Municipal Council have resolved that the revised Scheme sent up by the Sanitary Engineer may be adopted and that the Government may be pleasedto sanction half the cost of the scheme as grant and to advance the other half as a loan to the municipality repayable in 18 years at 3% interest It has been further stated in the resolution that the annual instalment of the loan and the interest due thereon may be adjusted out of the realisations from the water-rate which they have proposed to levy at 6 annas in the rupee of assessment on ~~taxes~~ lands and buildings

The Municipal Council have resolved to levy water rate at 8 annas in the rupee of assessment and not at 6 annas as has inadvertently been mentioned in the present resolution The records connected with the proposal to levy water rate have this day been forwarded separately for the orders of Government It

It is expected that the realisations from the water tax at 8 annas will come to about Rs 1000/-. Besides the water rate proposed to be levied, the Municipal Council have introduced the levy of market fees with effect from January 1937 and have also extended the levy of Octroi to more articles. The revision of assessment is impending and the annual income of the Municipality will increase to a certain extent by the revision. In the foregoing circumstances, the municipality may be able to meet the annual maintenance charges as well as the annual instalment of the loan and I request that the sanction of the Government may be kindly obtained to the proposal.

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Shimoga District.
